## Macroeconomics

"To change the way students see the world: this is my goal in teaching economics and in writing this book. Three facts about students are my guiding principles. First, they want to learn, but they are over-whelmed by the volume of claims on their time and energy. So, they must see the relevance to their lives and future careers of what they are being asked to learn. Second, students want to get it, and get it quickly. So, they must be presented with clear and succinct explanations. And third, students want to make sense of today's

world and be better prepared for life after school. So, they must be shown how to apply the timeless principles of economics and its models to illuminate and provide a guide to understanding today's events and issues, and the future challenges they are likely to encounter. The organization of this text arises directly from these guiding principles\)--

## **Bndl: Principles of Microeconomics**

Intended primarily for Managerial Economics courses, this text also provides practical content to current and aspiring industry professionals. Economics is a powerful tool that can help managers to manage effectively. In Managerial Economics Jeffrey Perloff and James Brander use real-world issues and examples from actual markets to show future managers how economic principles can be used in business decisions. In text examples and boxed mini-cases use actual data to illustrate how to use basic models. For example, to illustrate rivalry in oligopolistic markets, the authors look at rivalry between United and American Airlines and between Coke and Pepsi. Mini-case examples include why American Apparel is vertically integrated and why upscale manufacturers limit the number of designer hand-bags a customer is allowed to buy. To help future managers learn to solve new problems, Perloff and Brander repeatedly demonstrate problem-solving through in-text Q&As. Each Q&A poses an important managerial or economic issue and demonstrates how to solve it using a step-by-step approach.
