Now revised and updated to incorporate numerous new materials, this is the major source for researching American Christian activity in China, especially that of missions and missionaries. It provides a thorough introduction and guide to primary and secondary sources on Christian enterprises and individuals in China that are preserved in hundreds of libraries, archives, historical societies, headquarters of religious orders, and other repositories in the United States. It includes data from the beginnings of Christianity in China in the early eighth century through 1952, when American missionary activity in China virtually ceased. For this new edition, the institutional base has shifted from the Princeton Theological Seminary (Protestant) to the Ricci Institute for Chinese-Western Cultural Relations at the University of San Francisco (Jesuit), reflecting the ecumenical nature of this monumental undertaking.

Robust health care systems are paramount for the health, security, and prosperity of people and countries as a whole. This book provides for the first time a chronicle of the struggle for, and eventual success of, universal health coverage (UHC) in Tanzania. Beginning with an introduction to primary health care in the country, from its historical foundations to the major milestones of implementation, this book then considers stewardship of this important aspect of health systems over time. Concluding with a look to the future, forecasting the changes and new solutions needed to adapt to a changing world, this book is a valuable reference for policy makers, global health practitioners, health system managers, researchers, students, and all those with an interest in primary health care and reforms - both in Tanzania and beyond.

Are you looking for fresh ways to walk with, talk with, and listen to God? "Be still and know that I am God" is an invitation that has echoed throughout history. But how do we apply it to our daily lives? The reality is this: We don't need to be static for our hearts to be still. In the midst of a full, busy life, we can spend quiet time with God. Be Still is a prayer book for anyone looking to set aside intentional time with God and revitalize the way they pray. Brian Heasley shares what he has learned from his thirty-year prayer habit so that you can explore various ways to pray, including Scripture memorization, prayer running, or simply being more alert to God's work and his beauty everywhere. Consider how to develop a regular quiet time.

Make space to let God's heart touch your heart. Learn to reflect with awe, reverence, and wonder. Unpack key topics with the option of group discussion. Grow and deepen your daily relationship with God. Cultivate a deeper desire to meet with God and to share his love with others. Packed full of ideas for different ways to pray and tips and advice for how to build prayer practices into everyday life, *Be Still* will change the way you think about prayer and devotion and equip you with all the tools you need to deepen your relationship with God. An excellent small group or mentoring tool as well as a resource for youth leaders and new believers. Companion guide to 24-7 Prayer's *Be Still* prayer course.

The population of Asia is growing both larger and older. Demographically the most important continent on the world, Asia's population, currently estimated to be 4.2 billion, is expected to increase to about 5.9 billion by 2050. Rapid declines in fertility, together with rising life expectancy, are altering the age structure of the population so that in 2050, for the first time in history, there will be roughly as many people in Asia over the age of 65 as under the age of 15. It is against this backdrop that the Division of Behavioral and Social Research at the U.S. National Institute on Aging (NIA) asked the National Research Council (NRC), through the Committee on Population, to undertake a project on advancing behavioral and social research on aging in Asia. *Aging in Asia: Findings from New and Emerging Data Initiatives* is a peer-reviewed collection of papers from China, India, Indonesia, Japan, and Thailand that were presented at two conferences organized in conjunction with the Chinese Academy of Sciences, Indian National Science Academy, Indonesian Academy of Sciences, and Science Council of Japan; the first conference was hosted by the Chinese Academy of Social Sciences in Beijing, and the second conference was hosted by the Indian National Science Academy in New Delhi. The papers in the volume highlight the contributions from new and emerging data initiatives in the region and cover subject areas such as economic growth, labor markets, and consumption; family roles and responsibilities; and labor markets and consumption.

Literature and the Public Good

Our everyday lives are increasingly being lived through electronic media, which are changing our interactions and our communications in ways that we are only beginning to understand. In *Discourse 2.0: Language and New Media*, editors Deborah Tannen and Anna Marie Trester team up with top scholars in the field to shed light on the ways language is being used in, and shaped by, these new media contexts. Topics explored include: how Web 2.0 can be conceptualized and theorized; the role of English on the worldwide web; how use of social media such as Facebook and texting shape communication with family and friends; electronic discourse and assessment in educational and other settings; multimodality and the "\"participatory spectacle\"" in Web 2.0; asynchronicity and turn-taking; ways that we engage with technology including reading on-screen and on paper; and how all of these processes interplay with meaning-making. Students, professionals, and individuals will discover that *Discourse 2.0* offers a rich source of insight into these new forms of discourse that are pervasive in our lives.

Fifteen in a series of annual reports comparing business regulation in 190 economies, *Doing Business 2018* measures aspects of regulation affecting 10 areas of everyday business activity: •Starting a business •Dealing

with construction permits •Getting electricity •Registering property •Getting credit •Protecting minority investors •Paying taxes •Trading across borders •Enforcing contracts •Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. The report updates all indicators as of June 1, 2017, ranks economies on their overall “ease of doing business”, and analyzes reforms to business regulation – identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception. Data Notes; Distance to Frontier and Ease of Doing Business Ranking; and Summaries of Doing Business Reforms in 2016/17 can be downloaded separately from the Doing Business website.

The Digital Difference examines how the transition from the industrial-era media of one-way publishing and broadcasting to the two-way digital era of online search and social media has affected the dynamics of public life. In the digital age, fundamental beliefs about privacy and identity are subject to change, as is the formal legal basis of freedom of expression. Will it be possible to maintain a vibrant and open marketplace of ideas? In W. Russell Neuman’s analysis, the marketplace metaphor does not signal that money buys influence, but rather just the opposite—that the digital commons must be open to all ideas so that the most powerful ideas win public attention on their merits rather than on the taken-for-granted authority of their authorship. “Well-documented, methodical, provocative, and clear, The Digital Difference deserves a prominent place in communication seminars and graduate courses in research methods because of its reorientation of media effects research and its application to media policy making.” —John P. Ferré, *Journalism and Mass Communication Quarterly*

Be Still

An exciting and richly detailed new history of the Silk Road that tells how it became more important as a route for diplomacy than for trade The King’s Road offers a new interpretation of the history of the Silk Road, emphasizing its importance as a diplomatic route, rather than a commercial one. Tracing the arduous journeys of diplomatic envoys, Xin Wen presents a rich social history of long-distance travel that played out in deserts, post stations, palaces, and polo fields. The book tells the story of the everyday lives of diplomatic travelers on the Silk Road—what they ate and drank, the gifts they carried, and the animals that accompanied them—and how they navigated a complex web of geographic, cultural, and linguistic boundaries. It also describes the risks and dangers envoys faced along the way—from financial catastrophe to robbery and murder. Using documents unearthed from the famous Dunhuang “library cave” in Western China, The King’s Road paints a detailed picture of the intricate network of trans-Eurasian transportation and communication routes that was established between 850 and 1000 CE. By exploring the motivations of the kings who dispatched envoys along the Silk Road and describing the transformative social and economic effects of their journeys, the book reveals the inner workings of an interstate network distinct from the Sino-centric “tributary” system. In shifting the narrative of the Silk Road from the transport of commodities to the exchange of diplomatic gifts and personnel, The King’s Road puts the history of Eastern Eurasia in a new light.

“Come as You Are: Art of the 1990s is the largest and most ambitious contemporary art exhibition ever to be mounted by the Montclair Art Museum. The exhibition and book spotlight a pivotal moment in the recent

history of art. Chronicling the 1990s between 1989 and 2001—from the fall of the Berlin Wall to 9/11—"Come As You Are" examines how the art of this period both reflected and helped shape the dramatic societal events of the era, when the combined forces of new technologies and globalization gave rise to the accelerated international art world that we know today"--

Here is a fascinating compact history of Chinese political, economic, and cultural life, ranging from the origins of civilization in China to the beginning of the 21st century. Historian Paul Ropp combines vivid story-telling with astute analysis to shed light on some of the larger questions of Chinese history. What is distinctive about China in comparison with other civilizations? What have been the major changes and continuities in Chinese life over the past four millennia? Offering a global perspective, the book shows how China's nomadic neighbors to the north and west influenced much of the political, military, and even cultural history of China. Ropp also examines Sino-Indian relations, highlighting the impact of the thriving trade between India and China as well as the profound effect of Indian Buddhism on Chinese life. Finally, the author discusses the humiliation of China at the hands of Western powers and Japan, explaining how these recent events have shaped China's quest for wealth, power and respect today, and have colored China's perception of its own place in world history.

The 2022 EUROCALL conference was held in Reykjavik on 17-19 August 2022 as a fully online event hosted by the Vigdís Finnbogadóttir Institute for Foreign Languages, the University of Iceland, and the Árni Magnússon Institute for Icelandic Studies. The conference theme was Intelligent CALL, granular systems and learner data. This theme reflects the newest developments in the field of technology for language learning. Subfields such as natural language processing and machine learning not only enable smoother spoken and written communication between human learners and computers, but also offer ways in which language learning can be tailored to the needs of individual learners. By adding components of automatic speech recognition, text-to-speech systems, automatic feedback mechanisms, and tracking systems monitoring learners' progress and their use of tools, applications are becoming better targeted. All of this is used to optimise the learning experience of individual learners. This volume includes 66 short papers by some of the EUROCALL 2022 presenters and it offers a combination of research studies and theoretical papers reflecting the subthemes of the conference. The articles are ordered alphabetically.

Life in Change

Intelligence in the Digital Age examines how our current Internet age and people's use of digital technologies may be affecting their mental capacities and emotive lives in ways in which it will become increasingly difficult for those people to explore a larger, more expansive consciousness. After beginning with an examination of how people's attention spans, working memories, and capacity for deep thought and reading are being imperiled by their addictive use of smart phones and PCs, the discussion continues with how this may be occurring at a deep level at which the brain creates short and long-term memories, pays attention, and thinks creatively. The book then explores how these negative effects may impede the search to explore the limits of one's thinking mind and memories in pursuit of a larger intelligence. People may have fewer opportunities to be successful in this pursuit simply because they will have lost access to important personal dynamics due to the effects of the digital world on their minds, brains, and inner lives.

This book explores the connections between sound and memory across all electronic media, with a particular focus on radio. Street explores our capacity to remember through sound and how we can help ourselves preserve a sense of self through the continuity of memory. In so doing, he analyzes how the brain is triggered by the memory of programs, songs, and individual sounds. He then examines the growing importance of sound archives, community radio and current research using GPS technology for the history of place, as well as the potential for developing strategies to aid Alzheimer's and dementia patients through audio memory.

Come as You Are

China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study, for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an

important role in the history of China Proper and will also include material on Taiwan, and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.

Intelligent CALL, granular systems and learner data: short papers from EUROCALL 2022

It is common knowledge that slavery and indenture were characterized by long hours of physical labor, restriction of movement and other basic human freedoms, and severe punishment for violations of draconian labor laws. Less well known is the fact that nutrition was very deficient and a range of infectious diseases maimed, debilitated and killed on a large scale. In trying to narrow the knowledge gap with respect to Guyana, Ramesh Gampat shows that extremely poor sanitary conditions, awful hygiene and malnutrition hastened widespread infections and created a vicious cycle. The British protected its own soldiers, officials and colonists by establishing a medical enclave that lasted until Emancipation in 1838. Former slaves were then quarantined to neglected and decaying villages and Indians to plantations. Concern with health conditions appeared only during periods of epidemics and even then it was essentially for the protection of Europeans. Colonial medicine opened the way for stereotyping, labeling, racialization of disease, neutralization of potential leaders in the struggle for justice, and crystallization of the view that Europeans were superior to Blacks and Indians. Shorter stature and shorter life expectancy are good indications that slaves and indentured immigrants fared considerably less well than Europeans. Several infectious diseases sickened and fell Blacks and Indians, including malaria and undefined fevers, pneumonia and bronchitis, diarrhea and enteritis, tuberculosis, pneumonia and hookworm. The conquest of malaria in the early 1950s accelerated the epidemiological transition from communicable to chronic noncommunicable diseases, and today NCDs account for some three-quarters of all deaths in Guyana. Malaria has reemerged, fueled by a gold boom that consumes huge amounts of mercury. The potentially adverse public health consequences of this relatively new dynamic, the combined trio, have been neglected.

The first edition of John Woo: The Films (McFarland, 1999) was the earliest English-language volume to address the motion picture output of the celebrated Hong Kong director. The book dealt with Woo's film career from his professional beginnings in 1968 through his first three Hollywood releases (Hard Target, Broken Arrow and Face/Off), situating his work within Asian and Western cinematic and cultural traditions. This second edition offers a wealth of additional information, including treatment of John Woo's Hollywood productions Mission: Impossible II, Windtalkers and Paycheck. Also featured is material on Woo's epic Red

Cliff, filmed in China. A new foreword is provided by Tony Williams, author of John Woo's *Bullet in the Head*. Instructors considering this book for use in a course may request an examination copy here.
