In higher education, professional online identities have become increasingly important. A rightly worded tweet can cause an academic blog post to go viral. A wrongly worded tweet can get a professor fired. Regular news items in *The Chronicle of Higher Education* and *Inside Higher Ed* provide evidence that reputations are both built and crushed via online platforms. Ironically, given the importance of digital identities to job searches, the promotion and distribution of scholarly work, pedagogical innovation, and many other components of an academic life, higher education professionals receive little to no training about how to best represent themselves in a digital space. *Managing Your Professional Identity Online: A Guide for Higher Education* fills this gap by offering higher education professionals the information and guidance they need to:

- craft strong online biographical statements for a range of platforms;
- prioritize where and how they want to represent themselves online in a professional capacity;
- intentionally and purposefully create an effective brand for their professional identity online;
- develop online profiles that are consistent, professional, accurate, organized, of good quality, and representative of their academic lives;
- regularly update and maintain an online presence;
- post appropriately in a range of online platforms and environments; and
- successfully promote their professional accomplishments.

*Managing Your Professional Identity Online* is practical and action-oriented. In addition to offering a range of case studies demonstrating concrete examples of effective practices, the book is built around activities, templates, worksheets, rubrics, and bonus materials that walk readers through a step-by-step guide of how to design, build, and maintain professional online identities.

In this searing polemic, Lee Edelman outlines a radically uncompromising new ethics of queer theory. His main target is the all-pervasive figure of the child, which he reads as the linchpin of our universal politics of "reproductive futurism." Edelman argues that the child, understood as innocence in need of protection, represents the possibility of the future against which the queer is positioned as the embodiment of a relentlessly narcissistic, antisocial, and future-negating drive. He boldly insists that the efficacy of queerness lies in its very willingness to embrace this refusal of the social and political order. In *No Future*, Edelman urges queers to abandon the stance of accommodation and accede to their status as figures for the force of a negativity that he links with irony, jouissance, and, ultimately, the death drive itself. Closely engaging with literary texts, Edelman makes a compelling case for imagining Scrooge without Tiny Tim and Silas Marner without little Eppie. Looking to Alfred Hitchcock's films, he embraces two of the director's most notorious creations: the sadistic Leonard of North by Northwest, who steps on the hand that holds the couple precariously above the abyss, and the terrifying title figures of *The Birds*, with their predilection for children.

Edelman enlarges the reach of contemporary psychoanalytic theory as he brings it to bear not only on works of literature and film but also on such current political flashpoints as gay marriage and gay parenting. Throwing down the theoretical gauntlet, *No Future* reimagines queerness with a passion certain to spark an equally impassioned debate among its readers.

The first and fullest account of the suppressed history and continuing presence of Native Americans in Washington, DC. Washington, DC, is Indian land, but Indigenous peoples are often left out of the national narrative of the United States and erased in the capital city. To redress this myth of invisibility, *Indigenous DC* shines a light upon the oft-overlooked contributions of tribal leaders and politicians, artists and activists to the rich history of the District of Columbia, and their imprint—at times memorialized in physical representations, and at other times living on only through oral history—upon this place. Inspired by author Elizabeth Rule's award-winning public history mobile app and decolonial mapping project *Guide to Indigenous DC*, this book brings together the original inhabitants who call the District their traditional territory, the diverse Indigenous diaspora who has made community here, and the land itself in a narrative arc that makes clear that all land is Native land. The acknowledgment that DC is an Indigenous space inserts the Indigenous perspective into the national narrative and opens the door for future possibilities of Indigenous empowerment and sovereignty. This important book is a valuable and informational resource on both Washington, DC, regional history and Native American history.

Boost student success by reversing your perspective on college readiness. The national conversation asking "Are students college-ready?" concentrates on numerous factors that are beyond higher education's control. *Becoming a Student-Ready College* flips the college readiness conversation to provide a new perspective on creating institutional value and facilitating student success. Instead of focusing on student preparedness for college (or lack thereof), this book asks the more pragmatic question of what are colleges and universities doing to prepare for the students who are entering their institutions? What must change in an institution's policies, practices, and culture in order to be student-ready? Clear and concise, this book is packed with insightful discussion and practical strategies for achieving your ambitious student success goals. These ideas for redesigning practices and policies provide more than food for thought—they offer a real-world framework for real institutional change. You'll learn: How educators can acknowledge their own biases and assumptions about underserved students in order to allow for change. New ways to advance student learning and success. How to develop and value student assets and social capital. Strategies and approaches for creating a new student-focused culture of leadership at every level. To truly become student-ready, educators must make difficult decisions, face the pressures of accountability, and address their preconceived notions about student success head-on. *Becoming a Student-Ready College* provides a reality check based on today's higher education environment.

The current trend of learner centeredness in education has been challenging many of the current ways of working, especially in higher education institutions. This rapid change in educational institutions demands educators acquire new sets of skills via continuous reflective practices. Hence, educators in higher education institutions are actively involved in research-driven teaching and learning practices. This change of role from mere content delivery to learning facilitators could be better achieved through a strong research-driven community of practice. Preparing 21st Century Teachers for Teach Less, Learn More (TLLM) Pedagogies is a pivotal reference source that provides vital research on the application of practice-based learning techniques in higher education institutions. This publication establishes a platform for academics to share their best practices to promote teach less, learn more pedagogies and learn reciprocally from the community of practice. While highlighting topics such as interactive learning, experiential technology, and logical thinking skills, this book is ideally designed for teachers, instructional designers, higher education faculty, deans, researchers, professionals, universities, academicians, and students seeking current research on transformative learning and future teaching practices.

Multimodal composition is becoming increasingly popular in university classrooms as faculty, students, and institutions come to recognize that old and new technologies have enabled, and even demanded, the use of more than one composing mode for communicating, solving problems, and keeping up with the latest discourse. Professionalizing Multimodal Composition embraces and enacts multimodal composition in various writing courses and programs by exploring institutional, programmatic, and individual faculty initiatives for capacity building and human resource development across institutions. Academic leaders, scholars, and faculty who have successfully designed and launched academic programs or faculty development initiatives discuss the theoretical and logistical questions considered in their design, the outcomes they achieved, and how others can emulate them. This exchange of knowledge, insight, experiences, and lessons learned among community members is critical for enabling or inspiring other programs, departments, and institutions to conceive, design, and launch academic programs or faculty development initiatives for their own faculty. The larger goal of professionalizing is to work with teaching faculty to increase their interactional expertise with multimodal composition, and this collection offers a set of models for how faculty can do that at their own institutions and in their own programs.

## **Preparing 21st Century Teachers for Teach Less, Learn More (TLLM) Pedagogies**

This essay collection explores the inextricable link between rhetoric, public memory, and campus history projects. Since the early twentieth century after Brown University appointed its Steering Committee on Slavery and Justice, higher education institutions around the globe have launched initiatives to research,

document, and share their connections to slavery and its legacies. Many of these explorations have led to investigations about the rhetorical nature of campus history projects, including the names of buildings, the installation of monuments, the publication of books, the production of resolutions, and the hosting of public programs. The essays in this collection examine the rhetorical nature of a range of initiatives, including the creation of land acknowledgement statements, the memorialization of universities' historic financial ties to the slave trade, the installation and removal of monuments or historical markers, the development of curriculum for campus history projects. The book takes a chronological approach, beginning with the examination of a project at a university that was built on the site of a historic Native American town, moving through a series of essays about initiatives that grew out of universities' associations with slavery and its legacies in the United Kingdom and America, and ending with a critique of several pedagogical approaches in campus history courses designed for undergraduate students.
