50 year old Kenwood Chef mixer repair and refurbishment - 50 year old Kenwood Chef mixer repair and

refurbishment by Daft Old Man 13,252 views 2 years ago 31 minutes - This mixer began to smoke when in use. I repair the motor speed control circuitboard. Replace a damaged power cable.

This is a 50 year old Kenwood Chef Excel food mixer

The owner said black smoke came put of it

The speed control works but sounds and the machine smells of burning

Removing the electrical connection cover

Disconnecting the Live and Neutral wires

Removing screws from the hinge plate

Removing electrical connector block

Removing plastic electrics cover

Circuitboard removed

This capacitor case is bulging, burnt and split

Removing two screws holding the circuitboard to the plastic mount

Marking the damaged capacitor

Unsoldering the capacitor wires

Unsoldering second capacitor

Using desoldering braid to remove solder
Modern capacitors are smaller so I am bending the legs to fit
Soldering the two capacitors to the circuitboard
Two new capacitors in place
Adding heatshrink tube to the old wires
Replacing the repaired circuitboard
Soldering the wires back on to the circuitboard
Adding power lead so I can do a quick test
Removing front cover
Gently prying off the star clip
Removing the mix paddle drive
Super clean now!
Driving on the star clip with a small socket
I am using Petroleum jelly as grease for the gear. It is food safe
Plastic parts from the mixer that need cleaning
Dish soap and warm water
Speedy cleaning
Removing the remains of old rubber
Replacing the plastic covers
Removing the rotary switch because I want to clean behind it
It is dirty behind the rotary switch
Look what I found when I started cleaning the electric cable
There are strands of wire sticking out from inside
They push in to place and then you hammer the center pin
Let's try out the renovated mixer

Kenwood Cooking Chef | Williams-Sonoma - Kenwood Cooking Chef | Williams-Sonoma by Williams
