A beautiful hardcover edition of the New York Times Best Seller! These blockbuster danmei/Boys' Love novels from China inspired the animated series: an epic historical fantasy about a prince and the mysterious man by his side. Born the crown prince of a prosperous kingdom, Xie Lian was renowned for his beauty, strength, and purity. His years of dedicated study and noble deeds allowed him to ascend to godhood. But those who rise may also fall, and fall he does--cast from the heavens and banished to the world below. Eight hundred years after his mortal life, Xie Lian has ascended to godhood for the third time, angering most of the gods in the process. To repay his debts, he is sent to the Mortal Realm to hunt down violent ghosts and troublemaking spirits who prey on the living. Along his travels, he meets the fascinating and brilliant San Lang, a young man with whom he feels an instant connection. Yet San Lang is clearly more than he appears... What mysteries lie behind that carefree smile? This Chinese xianxia fantasy novel series built around the romanticized love between two men (danmei) is the newest work from author Mo Xiang Tong Xiu, and has spawned an ongoing multimedia franchise that's beloved across the world--including the animated series (donghua) that amassed 100+ million views in just its first month. This deluxe hardcover rerelease of Seven Seas' bestselling English-language paperback features special embellishments: a dust jacket featuring all-new art and foil lettering, a new foil illustration against linen-texture graining on the hardcover itself, elaborate printed edges, and a ribbon bookmark. Featuring art from Arisk_k, zaxnianx, ZeldaCW, and ?????? (tai3_3).

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Heaven Official's Blessing: Tian Guan Ci Fu (Deluxe Hardcover Novel) Vol. 1

Written by experts from London's renowned Royal Free Hospital, Textbook of Plastic and Reconstructive Surgery offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, Textbook of Plastic and Reconstructive Surgery is essential reading for anyone interested in furthering their knowledge of this exciting field. Blue Exorcist, Vol. 18

Improvised explosive devices (IEDs) are a type of unconventional explosive weapon that can be deployed in a variety of ways, and can cause loss of life, injury, and property damage in both military and civilian environments. Terrorists, violent extremists, and criminals often choose IEDs because the ingredients, components, and instructions required to make IEDs are highly accessible. In many cases, precursor chemicals enable this criminal use of IEDs because they are used in the manufacture of homemade explosives (HMEs), which are often used as a component of IEDs. Many precursor chemicals are frequently used in industrial manufacturing and may be available as commercial products for personal use. Guides for making HMEs and instructions for constructing IEDs are widely available and can be easily found on the internet. Other countries restrict access to precursor chemicals in an effort to reduce the opportunity for HMEs to be used in IEDs. Although IED attacks have been less frequent in the United States than in other countries, IEDs remain a persistent domestic threat. Restricting access to precursor chemicals might contribute to reducing the threat of IED attacks and in turn prevent potentially devastating bombings, save lives, and reduce financial impacts. Reducing the Threat of Improvised Explosive Device Attacks by Restricting Access to Explosive Precursor Chemicals prioritizes precursor chemicals that can be used to make HMEs and analyzes the movement of those chemicals through United States commercial supply chains and identifies potential vulnerabilities. This report examines current United States and international regulation of the chemicals, and compares the economic, security, and other tradeoffs among potential control strategies.

This publication presents cleaning and etching solutions, their applications, and results on inorganic materials. It is a comprehensive collection of etching and cleaning solutions in a single source. Chemical formulas are presented in one of three standard formats - general, electrolytic or ionized gas formats - to insure inclusion of all necessary operational data as shown in references that accompany each numbered formula. The book describes other applications of specific solutions, including their use on other metals or metallic compounds. Physical properties, association of natural and man-made minerals, and materials are shown in relationship to crystal structure, special processing techniques and solid state devices and assemblies fabricated. This publication also presents a number of organic materials which are widely used in handling and general processing...waxes, plastics, and lacquers for example. It is useful to individuals involved in study, development, and processing of metals and metallic compounds. It is invaluable for readers from the college level to industrial R & D and full-scale device fabrication, testing and sales. Scientific disciplines, work areas and individuals with great interest include: chemistry, physics, metallurgy, geology, solid state, ceramic and glass, research libraries, individuals dealing with chemical processing of inorganic materials, societies and schools.

How Tobacco Smoke Causes Disease

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled \"Historical Painting Techniques, Materials, and Studio Practice\" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Bleach: Can't Fear Your Own World, Vol. 3

Australia has a new \$50 billion industry. It carries unprecedented environmental risks but could be the path to energy salvation: cleaner than coal, safer than nuclear, a complement to renewables. Suddenly it seems, coal seam gas is being found everywhere: under homes, under farms, under forests. Communities across the country are up in arms and governments are scrambling to satisfy competing demands for affordable energy with protection of our land and water. Big oil and gas companies hope Australia will soon be the biggest liquid natural gas exporter in the world, but Greenies and farmers are united in their opposition to coal seam gas extraction, especially on our most fertile agricultural land. In this brilliant account, journalist and energy expert Paddy Manning unpicks the coal seam gas extraction story, visiting drill sites, boardrooms, pipelines, parliamentary offices and angry farm-gate protests. It seems that coal seam gas extraction may be one boom that's happening too fast.

The Handbook of Clinical Techniques in Pediatric Dentistry provides the clinician with an increased level of expertise and skills for timely identification and intervention for various presentations in the developing dentition. It also clearly describes procedures for treatment in the primary and young permanent dentitions, including pulp therapy for primary and young permanent molars, extractions, space maintenance, and more. The most commonly encountered treatment needs are discussed with the goal of increasing clinician and staff confidence while decreasing chair-time and stress. With an emphasis on practical instruction, The Handbook of Clinical Techniques in Pediatric Dentistry is ideal for pediatric and general dentists, pediatric residents, and dental students taking clinical pediatric courses.

Clean My Space

"I've been a big fan of the timeless concept of Bucket Filling . . . This newcomer . . . brings an important dimension to the idea of filling and dipping by addressing the invisible lid to help with what to do with the ouches in life. . . I think you'll find it'll make the intangible concepts of kindness, resilience and grit something that our learners can hold on to and apply as they learn to sail the somewhat stormy seas of life."

—Barbara Gruener, *The Corner on Character*

The latest release in the bestselling Bucket Fillers line takes the concept of bucket filling one step further by adding the idea that we also have an invisible lid. We "use our lid" to protect and keep the happiness inside our bucket. Offering charming illustrations with personified buckets, dippers, and lids, readers learn what gives happiness, what takes it away, and what protects it. This concrete concept helps children of all ages grow in understanding, kindness, self-control, resilience, empathy, and forgiveness. A valuable teaching tool for home, school, and life, this is a stand-alone or companion book to the other award-winning books by Bucket Fillers, Inc. Winner of 1 award. The music came back up and the next group of little girls, slightly older, came out. There was a lot of that in the next hour and change. I liked dance, and it was no reflection on the kids, but my will to live began to seep away on about the fifth group of sequined children... Anita Blake is back in St. Louis and trying to live a normal life—as normal as possible for someone who is a legal vampire executioner and a U. S. Marshal. There are lovers, friends and their children, school programs to attend. In the midst of all the ordinary happiness a vampire from Anita's past reaches out. She was supposed to be dead, killed in an explosion, but the Mother of All Darkness is the first vampire, their dark creator. It's hard to kill a god. This dark goddess has reached out to her here—in St. Louis, home of everyone Anita loves most. The Mother of All Darkness has decided she has to act now or never, to control Anita, and all the vampires in America. The Mother of All Darkness believes that the triumvirate created by master vampire Jean-Claude with Anita and the werewolf Richard Zeeman has enough power for her to regain a body and to immigrate to the New World. But the body she wants to possess is already taken. Anita is about to learn a whole new meaning to sharing her body, one that has nothing to do with the bedroom. And if the Mother of All Darkness can't succeed in taking over Anita's body for herself, she means to see that no one else has the use of it, ever again. Even Belle Morte, not always a friend to Anita, has sent word: "Run if you can..."
