TRAUMA CENTER

Traumatic experiences and their consequences are often the core of life stories told by survivors of violence.

In *Trauma: Life Stories of Survivors* leading academics explore the relationship between the experiences of terror and helplessness that have caused trauma, the ways in which survivors remember, and the representation of these memories in the language and form of their life stories. International case studies include the migration of Ethiopian Jews to Israel, the life stories of Guatemalan war widows, violence in South Africa, persecution of political prisoners in South Africa and the former Czechoslovakia, lynching in the Mississippi Delta, resistance in Zimbabwe's liberation war, sexual abuse, and the ongoing Irish troubles. The volume reveals the complexity of remembering and forgetting traumatic experiences, and shows that survivors are likely to express themselves in stories containing elements that are imaginary, fragmented, and loaded with symbolism. *Trauma: Life Stories of Survivors* is a groundbreaking work of relevance across the social sciences. This new perspective on trauma will be of particular importance to researchers in psychology, history, women's studies, anthropology, sociology and cultural studies.

Trauma

In this pulse-pounding medical memoir, trauma surgeon James Cole takes readers straight into the ER, where anything can and does happen. *TRAUMA* is Dr. Cole's harrowing account of his life spent in the ER and on the battlegrounds, fighting to save lives. In addition to his gripping stories of treating victims of gunshot wounds, stabbings, attempted suicides, flesh-eating bacteria, car crashes, industrial accidents, murder, and war, the book also covers the years during Cole's residency training when he was faced with 120-hour work weeks, excessive sleep deprivation, and the pressures of having to manage people dying of traumatic injury, often with little support. Unlike the authors of other medical memoirs, Cole trained to be a surgeon in the military and served as a physician member of a Marine Corps reconnaissance unit, United States Special Operations Command (USSOCOM), and on a Navy Reserve SEAL team. From treating war casualties in Afghanistan and Iraq to his experiences as a civilian trauma surgeon treating alcoholics, drug addicts, criminals, and the mentally deranged, *TRAUMA* is an intense look at one man's commitment to his country and to those most desperately in need of aid.

Not all stories from the ER are about adrenaline, trauma, sex injuries, intoxication, and are stranger than fiction . . . but these are. This is my collection of true accounts of each of these events that I witnessed or was accused of perpetrating myself. Enjoy!

Drama

Standing in the trauma room of an emergency department is like standing at ground zero of a nuclear reaction, only it's not radiation that is released-but stories. Stories that are told and retold, sometimes just until the end of the shift, but sometimes for decades. A survivor of domestic violence makes it to the hospital but cannot trust anyone. An anonymous man passes away after being taken to the emergency room, and no one can identify him. The spouse of a cancer patient must decide whether to force her to undergo chemotherapy or to let her pass away in peace. These stories-and all the rest in *People of the ER*-grapple with what it means to be human in the face of trauma and death. Written by the author of *Trauma Room Two*, *People of the ER*, delves deeper into the lives of the patients and staff that work in a small, rural emergency room.

Laboring in emergency rooms all around the country is a group of dedicated doctors and nurses who just want to make a difference. Some swear, some drink, and some laugh in order to manage their emotions while providing high-quality care in the most unimaginable, shocking, and difficult cases. Among this group of highly skilled medical professionals is Goldie Fisher, a nurse who is completing her first week of orientation at a level one trauma center. As she immerses herself in the organized chaos she now calls work, Goldie must learn how to control her emotions while juggling a diverse caseload, each with a new challenge. While caring for patients battling mental health issues, drug addiction, car accident injuries, gunshot wounds, and many other ailments, Goldie soon learns to rely on her adrenaline, inner-strength, and perseverance to endure the wild ride that comes with life as an emergency room nurse. Trauma Drama is the exciting story of an emergency room nurse's experiences as she embraces the ups and downs that accompany saving lives in a level one trauma center.

Trauma Drama

In every hospital emergency department there is a room reserved for trauma. It is a place where life and death are separated by the thinnest of margins. A place where some families celebrate the most improbable of victories while others face the most devastating of losses. A place where what matters the most in this life is revealed. Trauma Room Two is just such a place. In this collection of short stories, Dr. Green takes the reader inside the hidden emotional landscape of emergency medicine. Based on fifteen years of experience as an ER physician, he reveals the profound moments that often occur in emergency rooms for patients, their families, and the staff that work there.

Trauma Room Two

With unflinching honesty, an ER doctor tells readers what it's really like to be a caring physician with one of the most demanding, exhilarating, frustrating, and rewarding jobs in the world. An emergency medicine physician for nearly a decade, Dr. Pamela Grim has delivered babies, treated heart attacks, saved car accident victims, comforted the dying, and consoled the living who were left behind. She has worked all over the world, caring for victims of gang life in America's inner cities, victims of the war in Bosnia, poverty-stricken patients in Nigeria, and bank presidents in the United States. Relating these rich and varied experiences with

compelling prose, Dr. Grim takes readers into the E.R. and lets them experience first-hand what it takes to make split-second, life-and-death decisions in the course of an average day.

Just Here Trying to Save a Few Lives

Trauma: A Comprehensive Emergency Medicine Approach is a fully illustrated, interdisciplinary overview of trauma. Using both evidence-based approaches and a practical understanding of the emergency department, it gives a broad and in-depth review of trauma care. The entire spectrum of trauma presentations is reviewed from minor soft-tissue injuries through to major life-threatening conditions. Written by over 50 expert contributors, it gives concrete and practical recommendations for evaluation, treatment, consultation and disposition decisions on both common and unusual conditions. Extensive use of photographs, illustrations and key information boxes is used to make the material accessible. Additional sections provide an overview of multiple other issues relating to emergency management of trauma including administrative, nursing, research and legal matters. This book provides an essential reference for anyone who is called upon to provide acute trauma care in the emergency department.

"A stunning account of the chaos of the emergency room." —Boston Globe In this eye-opening account of life in the ER, Paul Austin recalls how the daily grind of long, erratic shifts and endless hordes of patients with sad stories sent him down a path of bitterness and cynicism. Gritty, powerful, and ultimately redemptive, *Something for the Pain* is a revealing glimpse into the fragility of compassion and sanity in the industrial setting of today's hospitals.

Something for the Pain: One Doctor's Account of Life and Death in the ER

In *Miracles and Mayhem in the ER*, Dr. Brent Russell shares true-life stories of his early days as an Emergency Room doctor. Contemplative and oftentimes hilarious, Dr. Russell leads the reader through the glass doors and down the narrow halls of the ER where desperate patients, young and old, come to get well. Occasionally heart wrenching and always fast-paced, *Miracles and Mayhem in the ER* will have readers holding their breath one second and celebrating the next. Through his night shifts at a renowned Portland, OR hospital, Russell discovers his role and his confidence as he treats people from all walks of life including humanity's most bizarre in the ER. Each shift brings a new, bracing story to tell.

Overcoming Emotional Trauma: Life Beyond Survival Mode is a balance of personal stories and perspective that is interwoven, and it works! Travis humanizes how trauma can play out in an individual for a deeper understanding. This book will help you look at other factors, besides just behaviors and symptoms. *Overcoming Emotional Trauma* is not only for professionals working with those who have experienced trauma, but for those who have experienced trauma themselves. The information included in this book can also have a wide spread application for the many systems we navigate in our daily lives, and for anyone who is interested in self-awareness and growth. Travis' story encapsulates what many of those operating in "survival mode" are actively living, which is sometimes difficult to put into words or describe. ~Alyssa Shepard, LMSW, Children and Family Therapist -Iowa

Trauma, Life Events and PTSD

The often complex problems of the trauma patient present many challenges to front line emergency staff. Multiple injuries involving many systems of the body require careful and timely prioritisation and intervention in the emergency department. *TraumaCare* provides emergency nurses with a practical guide to the systematic

assessment and management of trauma patients, equipping them with the clinical knowledge and practical skills necessary to initially assess and care for the trauma patient in the emergency department trauma environment. Trauma Care explores the concept of trauma assessment, focusing on patient priorities and interprofessional trauma team working. Individual chapters look at the essential assessment and management issues for each system of the body and specific age related complications. Emphasis is placed on key patient priorities, with acknowledgement to the common pitfalls in initial trauma care. This text will be essential for all emergency nurses, and those working in the emergency department.

Overcoming Emotional Trauma

The only book for EM Physicians that comprehensively covers what EM physicians need to know about caring for the trauma patient before the trauma surgeon takes over. This topic has become especially important for emergency physicians because in the last few years trauma centers have closed and fewer trauma surgeons have become certified, forcing the EM physician to have a larger role in the care of these patients. Market / Audience Emergency Physicians: 40,000 Emergency Nurses: 100,000 Emergency Departments: 5,000 About the Book Emergent Management of Trauma is the type of book that Emergency Physicians really need. It is a concise and compact, yet absolutely comprehensive explanation of what an EM doc needs to know and what they need to do to care for Trauma patients from the streets into the OR where the Acute Care Surgeon takes over. The third edition addresses changes in the field of trauma that have spilled over into emergency departments and changed the way that EM physicians care for trauma victims in that there is more medical care and these patients may be in the emergency department longer, and also that EM physicians will be more involved in getting the patient safely into surgery. Key Selling Features Concise and Complete: easy to read with hundreds of illustrations Comprehensive and Balanced: takes you from pre-hospital care through medical treatment and even into the OR with what to do to ensure smooth transition to surgical treatment Tells you what you need to know: bulleted lists provide clear rapid-access information on all trauma-related injuries Tells you what you need to do: includes step-by-step diagrams of key life saving procedures and discussion of what procedure is most appropriate for any given situation About the Authors John Bailitz, MD (Chicago, IL) Instructor, Department of Emergency Medicine, Rush Medical College; Assistant Program Director, Department of Emergency Medicine, John H. How do you rationalize the occurrence of human tragedy and the simultaneous existence of a benevolent God? During his 36 years working as an emergency physician in an urban, level 1 trauma center, Dr. Douglas Brunette has witnessed and experienced firsthand the entire spectra of human emotion, illness and injury. Daily unrelenting tragedies over many years resulted in his loss of faith and a belief in God. After a personal life-threatening medical illness, his life-long irreligious nature was challenged. He began to see the imprint of a Higher Power in recollections of past interactions with his patients and their families. Written in a heartening manner, each chapter narrative unfolds to provide an uplifting message that restores faith in

human beings and in our Higher Power. Readers of Faith in the ER will learn to experience their Higher Power in places and situations where it appears there is no God. Faith, courage, and optimism will be illuminated even in the darkest tragedy. The reader will enhance the understanding of their purpose in life, irrespective of their socioeconomic station or the status of their health. The true stories in this book will bring a smile to your face, and a warm feeling to your heart.

Emergency!

One night in early 1976, the world of trauma medicine changed forever in a frozen Nebraska field where Dr. James Styner crashed his small airplane with his wife and four children aboard. The experience of the eight hours he spent isolated and awaiting rescue that never came, his journey to the local hospital where he found inadequate care, and his family's evacuation and arrival at the sanctity of Lincoln General Hospital compelled him to develop a revolutionary new concept of emergency medical care. That night Advanced Trauma Life Support was born, and grew to become the standard of emergency trauma care throughout the world. Today it continues to save countless lives and it continues to grow. This is the story of ATLS and that tragic night for the Styner family, but it is also the story of the author's personal journey to find the truth about the accident that not only took the life of his mother, but nearly took his - and how doing so was one of the most important things he ever did.

Emergent Management of Trauma, Third Edition

The riveting, pulse-pounding story of a year in the life of an emergency room doctor trying to steer his patients and colleagues through a crushing pandemic and a violent summer, amidst a healthcare system that seems determined to leave them behind “Gripping . . . eloquent . . . This book reminds us how permanently interesting our bodies are, especially when they go wrong.”—The New York Times ONE OF THE BEST BOOKS OF THE YEAR: Time As an emergency room doctor working on the rapid evaluation unit, Dr. Thomas Fisher has about three minutes to spend with the patients who come into the South Side of Chicago ward where he works before directing them to the next stage of their care. Bleeding: three minutes. Untreated wound that becomes life-threatening: three minutes. Kidney failure: three minutes. He examines his patients inside and out, touches their bodies, comforts and consoles them, and holds their hands on what is often the worst day of their lives. Like them, he grew up on the South Side; this is his community and he grinds day in and day out to heal them. Through twenty years of clinical practice, time as a White House fellow, and work as a healthcare entrepreneur, Dr. Fisher has seen firsthand how our country's healthcare system can reflect the worst of society: treating the poor as expendable in order to provide top-notch care to a few. In *The Emergency*, Fisher brings us through his shift, as he works with limited time and resources to treat incoming patients. And when he goes home, he remains haunted by what he sees throughout his day. The brutal wait times, the disconnect between hospital executives and policymakers and the people they're supposed to serve, and the inaccessible solutions that could help his patients. To cope with the relentless onslaught exacerbated by the pandemic, Fisher begins writing letters to patients and colleagues—letters he will never send—explaining it all to them as best he can. As fast-paced as an ER shift, *The Emergency* has all the elements that make doctors' stories so compelling—the high stakes, the fascinating science and practice of medicine, the deep and fraught interactions between patients and doctors, the persistent contemplation of mortality. And, with the rare dual perspective of somebody who also has his hands deep in policy work, Fisher connects these human stories to the sometimes-cruel machinery of care. Beautifully written, vulnerable and deeply empathetic, *The Emergency* is a call for reform that offers a fresh vision of health care as a foundation of social justice.

Faith in the ER

Third in the series that features “tense, whip-smart medical scenes . . . a gripping view of doctors at work” from the New York Times-bestselling author (Tess Gerritsen). Keeping secrets can be murder . . . Angels of Mercy ER charge nurse Nora Halloran has been living with a painful secret for three long years. But when a

coworker is brutally assaulted and killed, she knows she can no longer remain silent. Determined to unmask the murderer, Nora teams up with her friends— Lydia, an ER attending with a secret of her own; Gina, the once-cocky resident now struggling to strike a balance between her family and her job; and Amanda, a med student caught between her career and her conscience. As the victim count grows, Nora must face her deepest fears and reveal all her secrets to save the man she loves in order to stop a monster . . . before he returns to silence her forever. (Previously published as Urgent Care) Praise for the Angels of Mercy series “A powerful and dramatic look into the frenzied world of emergency medicine . . . Lyons’ characters are dynamic and genuine.” —Suspense Magazine “A cast of four strong women . . . Un-put-downable pacing with interwoven plot lines. Dr. Lyons writes like a movie filmed without any cuts . . . Pick this book up if: you loved the TV show ER.” —ScienceThrillers.com “Lyons delivers a breathtakingly fast-paced medical thriller.” —Publishers Weekly

With an emphasis on the “hows and whys” of contemporary surgery, Operative Techniques in Trauma and Critical Care features concise, bulleted text, full-color illustrations, and intraoperative photographs to clarify exactly what to look for and how to proceed. Drawn from the larger Operative Techniques in Surgery, Second Edition, this newly stand-alone surgical atlas, overseen by editor-in-chief Mary T. Hawn and meticulously edited by Dr. Amy J. Goldberg, focuses on the steps of each technique, rapidly directing you to the information you need to choose the right approach for each patient, perform it successfully, and achieve the best possible results.

The Light of the Moon

The first edition of this publication was aimed at defining the current concepts of trauma induced coagulopathy by critically analyzing the most up-to-date studies from a clinical and basic science perspective. It served as a reference source for any clinician interested in reviewing the pathophysiology, diagnosis, and management of the coagulopathic trauma patient, and the data that supports it. By meticulously describing the methodology of most traditional as well as state of the art coagulation assays the reader is provided with a full understanding of the tests that are used to study trauma induced coagulopathy. With the growing interest in understanding and managing coagulation in trauma, this second edition has been expanded to 46 chapters from its original 35 to incorporate the massive global efforts in understanding, diagnosing, and treating trauma induced coagulopathy. The evolving use of blood products as well as recently introduced hemostatic medications is reviewed in detail. The text provides therapeutic strategies to treat specific coagulation abnormalities following severe injury, which goes beyond the first edition that largely was based on describing the mechanisms causing coagulation abnormalities. Trauma Induced Coagulopathy 2nd Edition is a valuable reference to clinicians that are faced with specific clinical challenges when managing coagulopathy.

Trauma, Life Events and PTSD

An urgent, on-the-scene account of chaos and compassion on the front lines of ground zero for Covid-19, from a senior doctor at New York City’s busiest emergency room “Remarkable and inspiring . . . We’re lucky to have this vivid firsthand account.”—A. J. Jacobs, bestselling author of The Year of Living Biblically When former New York Times journalist Dan Koeppel texted his cousin Robert Meyer, a twenty-year veteran of the emergency room at Montefiore Medical Center in the Bronx, at the beginning of the Covid-19

crisis in the United States, he expected to hear that things were hectic. On a scale of 1 to 10, 10 being overwhelmed, where do you think you are? Koeppel asked. Meyer's grave reply—100—was merely the cusp of the crisis that would soon touch every part of the globe. In need of an outlet to process the trauma of his working life over the coming months, Meyer continued to update Koeppel with what he'd seen and whom he'd treated. The result is an intimate record of historic turmoil and grief from the perspective of a remarkably resilient ER doctor. Every Minute Is a Day takes us into a hospital ravaged by Covid-19 and is filled with the stories of promises made that may be impossible to keep, of life or death choices for patients and their families, and of selflessness on the part of medical professionals who put themselves at incalculable risk. As fast-paced and high-tempo as the ER in which it takes place, Every Minute Is a Day is at its core an incomparable firsthand account of unrelenting compassion, and a reminder that every human life deserves a chance to be saved.

Advanced Trauma Life Support

The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

The Trauma Care Manual was first published in 2000, and was the first evidence-based manual of best trauma practice. Now in its second edition, it continues to offer clear and practical guidelines for the management of victims of major trauma, reflecting current practice in the United Kingdom and Europe. The second edition benefits from an increase in illustrative material, and is further enhanced by the addition of at least one case study for every topic in the book. 'Objectives' and 'Summary' boxes ensure a user-friendly approach, and are supplemented by key points, highlighted throughout the text. New to the second edition are

'Global Perspectives' boxes at the end of most of the chapters, which highlight techniques and practices from around the world. Written by members of Trauma Care and invited experts, the Trauma Care Manual offers a nationally accepted set of standards for good practice which provide a benchmark for all those involved in the care of the trauma patient. It is a unique reference for all professionals involved in the care of victims of trauma and an invaluable addition to every Accident and Emergency Department.

Emergency and Trauma Care for Nurses and Paramedics

Injuries are the leading cause of death and disability among people under age 35 in the United States. Despite great strides in injury prevention over the decades, injuries result in 150,000 deaths, 2.6 million hospitalizations, and 36 million visits to the emergency room each year. Reducing the Burden of Injury describes the cost and magnitude of the injury problem in America and looks critically at the current response by the public and private sectors, including: Data and surveillance needs. Research priorities. Trauma care systems development. Infrastructure support, including training for injury professionals. Firearm safety. Coordination among federal agencies. The authors define the field of injury and establish boundaries for the field regarding intentional injuries. This book highlights the crosscutting nature of the injury field, identifies opportunities to leverage resources and expertise of the numerous parties involved, and discusses issues regarding leadership at the federal level.

Watching What We Watch

Roma Kulkarni is having the time of her life. She's an extremely successful, rich, famous global concierge doctor with a brand of her own and a monopoly on medicine. However, she's got an ego the size of an overinflated SUV tire. And when patients begin to complain about Roma's ego and low quality of care, there's only one thing left to do. Exile her. To an emergency department. In Las Vegas. At night. Khalil Karam is passing the vibe check. That is, until Roma Kulkarni comes along and breaks the wonderful, normal, awesome ER's team in half. Roma only believes in the sickcare system, but he wants the healthcare system. He's assigned to teach her what it means to be a doctor. Khalil hates Roma, but he'll do anything to show this headstrong Newark-born A-lister what his ER means to him. So Roma has an exile to survive. Six months in the middle of the desert. And no penthouse! But whatever. It's not like she's actually going to change her ways, no matter what anyone tells her, no matter what she encounters. Like, not at all. Right? But the emergency room is a miraculous place. Even when the outlook seems bleak, hope prevails. As for all being fair? The chances of that are very, very slim.
